

Make a Dreidel

May be used with the K24U activity "Festival of Lights," found on pages 31-32 in the December 2002 issue.

Enlarge the pattern below to suit your needs. Trace on to construction paper or tag board. Color and draw the symbols in each square. Use a paper punch to put round holes in the top and bottom. Fold the flaps and glue them to form a box shape. Allow the glue to dry before placing a short pencil or pointed dowel through the holes. Now you're ready to play the Dreidel game while listening to "Festival of Lights."
